

# What Products are Certifiable with ISASecure®?

## Components

### Embedded Devices

- Programmable Logic Controllers (PLCs)
- Safety Controllers
- Remote Terminal Units (RTUs)
- Remote I/O
- Smart Transmitters
- Single Loop Controllers
- Logic Solvers
- Safety Related Programmable Electronic Systems
- Controllers
- Protection Relays
- Motor Drives
- Sensors
- IOT Devices
- Actuators
- Robotics
- IP Cameras
- Sensors and Controllers used for mechanical rooms, HVAC zones and for chillers and boilers
- Any device that directly monitors and/or controls an industrial process
- Notification Appliances (Sounders, Strobes, etc.)
- Protocol Converters
- Software Supervised Power Supplies
- Card Readers & Keypads
- Access System Controllers
- Door Controllers

### Network Devices

- Gateways
- Routers
- Switches
- Firewalls
- Wireless Controllers
- Security Appliances
- Intrusion Prevention Systems
- Data Diodes
- Edge Nodes
- Repeaters
- Intrusion Detection Systems

### Host Devices

- Industrial Computing Platforms
- Blade Servers
- Embedded PCs
- Ruggedized Computers
- Rack-Mounted Servers
- Industrial Laptops
- HMI Panels
- Industrial Tablets
- Terminals

### Software Applications

- Data Historians
- Human Machine Interface (HMI) Software
- Operator Interface Software
- System Configuration Software
- Batch Control Software
- Engineering and Design Tools
- Network Video Recorder Software

## Systems

An industrial Control system (ICS) or SCADA system available from a single supplier. It may be comprised of hardware and software components from various suppliers, but it must be integrated, and supported as a whole, by a single supplier.

### Examples:

- Control System Platform
- SCADA System Platform
- Packaged Control Systems
- Examples:
  - Boiler Control System
  - Burner Control System
  - Drilling Control System
  - Wellhead Control System
  - Packaging Machines
  - Reactors
  - Distillation
- Robotic Control System
- Power Control System
- HMI/PLC Combination System
- Safety Instrumented System (SIS)
- Building Management System (BMS)
- Safety-Related Programmable Electronic Systems
- Safety Control System
- Asset Management Systems
- Access Control & Event Management Systems
- Video Management Systems

This is an example list of products that can be certified in the ISASecure program. All ISASecure certifications ensure that products conform to international standards ISA / IEC 62443-3-3, ISA / IEC 62443-4-1, ISA / IEC 62443-4-2.
